Equine Performer Mineral Supplement

CELMANAX™ TOXO Mycotoxin control CALSPORIN®

Reduces Symptoms of BIGHEAD!

CattleKing would like to introduce our new Equine Performer Range!
It is the start of something big for our horse lovers!

Equine Performer Mineral Supplement is an easy-to-use mineral supplement for horses living on high oxalate pastures (including Kikuyu, Setaria, Buffel, Pangola, Green Panic and Pigweed). It ensures maximum health and digestion. **Equine Performer Mineral Supplement** is made from high quality protein meals and minerals, with the added bonus of **Turmeric, Calsporin** (Direct Fed Microbial Probiotic), **Celmanax** (Enzymactically Hydrolysed Yeast) and **Toxo MX** a Toxin Binder!
It includes balanced amounts of Calcium and Phosphorus, meaning it aids in the prevention of the debilitating disease, BIGHEAD. It is designed to be fed ADLIB in paddock situations.

What does this mean for your horse:

- *Counters the effect of Big Head.*
- *Improved feed digestibility.*
- *Optimised energy and nutrient partitioning toward growth and recovery.*
- *Support of beneficial microbial balance.*
- *Reduced Pathogenic bacterial load.*
- *Reduced Mycotoxin and Endotoxin load.*
- *Supports immune function.*
- *Improved animal recovery from work, injury and stress.*
- *Improved feed absorption.*

Why a Toxin Binder?

Mycotoxins found in our tropical grasses are having great effect on our horses. Horses ingest the mycotoxins and they enter the digestive tract. Stomach acid cannot effectively deactivate them. They enter the small intestine and hind gut, where they start damaging the intestinal wall or enter the blood stream. Common symptoms include hypersensitivity, poor condition, moody, loose stools and neurological disorders. Specific toxin binders have a capacity to bind a broad range of mycotoxins. Once they are bound together, the toxin binder renders them harmless and they pass through the digestive tract, being excreted with the manure. **So why not try our product!**

By feeding this product, your horse will receive everything it needs to stay in top form!
This product is suitable for all types of horses, including campdrafting, endurance, track work and work horses.
This product is NOT waterproof and does not contain molasses, added iron or cobalt!
